ALLIQUIPPA

**Mary Zartmen**

The great white house standing above the bay watching,  
watching as all the passerbyers watch- silently, silence.

In the morning the sun rises over the horizen and Alliquippa  
wakesup to a new, bright day. Happy noises coming from within  
tell of a big, healthy, contentfamily- living in the great white  
house.

The late morning brings the Alliquippa family outside to beautify  
the house still more.

In the afternoon they come out of their shell and take hikes to Sewall.  
Sewall is a long stretch of sand with the waves breaking on the shoreline.  
A most beautiful place with the hot sun skinning down on it's children.

Sailing is another challenging thing to do. The Small Point boats  
are graceful 19<sup>2</sup>-footers sailing to most any place they can fit.

In the evening they play small fun games that envolve sportsman  
ship and thought to win.

That ends the "Alliquippa" day and the Great White House goes to sleep  
to wake up to another challenging day.

The End

A large amount of people are buying knives. There are two main things  
a person should look for when buying a knife. The first thing to look for is a  
high quality blade. The second thing to look for are the safety features  
available.

To begin with, a high quality blade should be able to bend a small amount.  
If it is not flexible, it will crack. It is also important to remember that if  
it is too flexible the metal in the blade is probably of low quality.

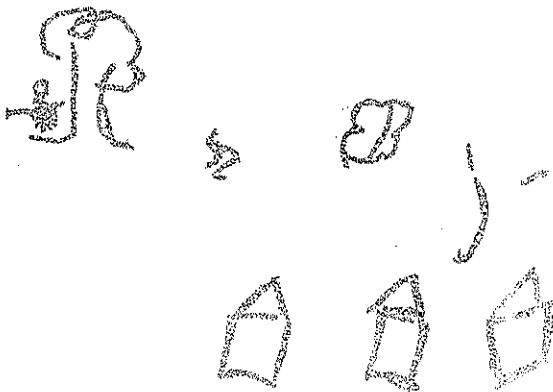

The safety features are important to protect you from accidental cuts.

Pocket knives, for instance, have a safety lock which keeps the blade  
from snapping back. Some knives are stiff and that's fine, but not always a good  
buy. Some knives will just snap back with the slightest amount of pressure.

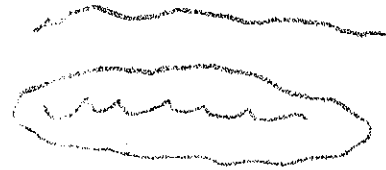

All of these things are important to remember when buying a knife.
